

Aspire course overview

Recommended age range:

Ages 14-16

Time required:

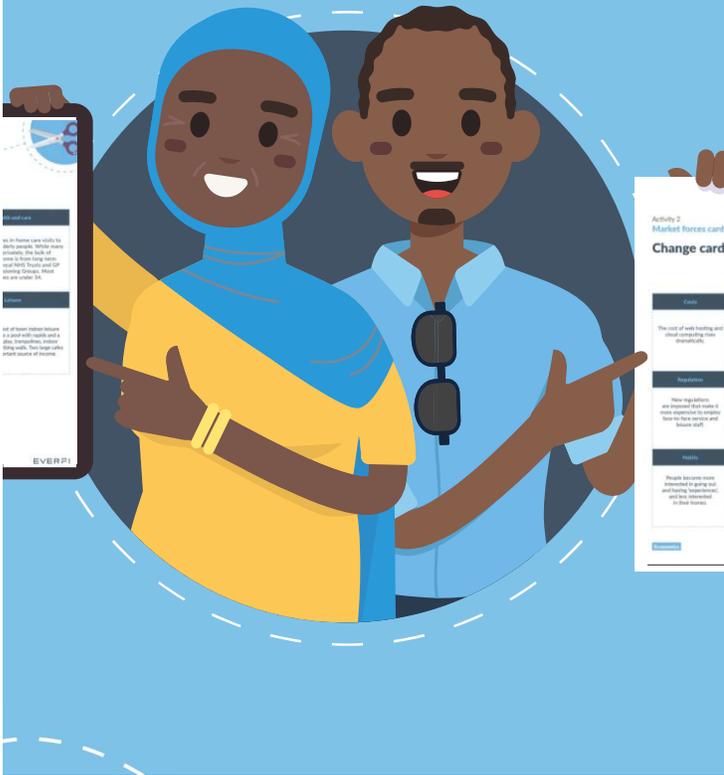

1-4 hours

Subject fit:

PSHE, Economics

Full curriculum links for all UK curricula are provided in the PowerPoint presentation.

As someone who's taught the material for nearly 20 years, I've not come across anything better.

Julian King, KS4 Economics teacher

This course will help you meet **Ofsted** requirements by assisting students to develop the essential knowledge they need to make smart decisions about how to make, save and invest money. In addition to this, students will also be encouraged to think about their own future, thinking about how they can best financially prepare themselves for their future ahead.

About this course

Aspire is designed to develop young people's understanding of the economy and to enable them to become more aware about how the economy affects their lives.

They will learn about the economy holistically by understanding its different components and what impacts it (the law of supply and demand). In addition to this, students will be encouraged to think of their future, where they will look at the various options available to be prepared financially in the best way possible.

Total time required

Total time required: 1-4 hours

Modules

Module 1

Marketplaces - Students explore how the economy can affect a business or career. They discover why it's helpful for everyone to have some basic knowledge of the economy. Students are introduced to various concepts, such as the law of supply and demand and opportunities for investing in the financial market.

Module 2

The economy - Students will learn about the government's role and its relationship with the economy, delve into the impact of current events and how this affects consumer behaviour in more detail.

Module 3

Funding a business - Students will identify opportunities and understand risks when starting a business. They will understand how external factors will impact starting up a business, think about what characteristics make a good entrepreneur, and examine the available schemes, i.e. loans, etc

Module 4

Investment basics - Students will learn about the different investment options available and will weigh up the advantages and disadvantages of each. They'll be encouraged to think about their financial future and how to achieve their savings goals safely and efficiently.

Module 5

Diversification - Students are introduced to the concept of an investment portfolio. They consider how to diversify their portfolio and spread their risk.
