EVERFI

Ignition course overview

Recommended age range:
Ages 11-14

Time required:
50 minutes to 7 hours,
depending on options selected

Subject fit:
PSHE and Computing.

Full curriculum links for all UK curricula are provided in the PowerPoint presentations.

Alyssa

We won the regional championships today! Guess who scored the winning goal?!?!

Post

> *As teachers, we can't overstate how important online safety is for our pupils. Many of them have been on social media for several years now and, unfortunately, they think they know quite a lot about how to keep themselves safe. That is not always the case. This is a subject that constantly needs reinforcing and this course hits the right age group to do that.*

About this course

Tweens and Teens today are spending more than 8.5 hours per day in front of a screen. Online activities allow these young digital natives to connect with people with common interests, and find creative ways to create and source content, but 68% of students feel that social media has a negative impact on themselves or their peers.

Ignition is a digital literacy and citizenship course dedicated to providing students with the skills they need to safely and confidently navigate the digital world. The course helps students acknowledge the benefits of digital communities and resources while guiding them to successfully navigate potential pitfalls in their digital lives.

The course has been designed in partnership with teachers and subject experts, and needs minimal preparation: all the subject knowledge you need is built in.The course is linked to national curricula in PSHE and Computing. Ignition has been widely acclaimed in the US and Canada, with more than 3.5 million pupils taking the course since 2010.
