

Ranches Primary School

Dubai, UAE

Learning Ladders adds significant value to Ranches Primary School's assessment and tracking processes, enabling the school to provide high-quality education that supports the holistic development of each student.

Introduction to the school

Ranches Primary School is a community school located in the Arabian Ranches 2 area. The school serves approximately 900 students from Nursery to Year 6, who come from 63 different nationalities.

The school follows the National Curriculum for England (NCfE), which is delivered by British trained teachers. In addition to this, the school enriches the learning experience by incorporating Arabic and Islamic education to promote the culture of the host nation.

Ranches Primary School has been using Learning Ladders for a year and a half. The system supports our commitment to providing high-quality education enriched with cultural diversity and promotes the holistic development of each student.

William Barratt
Assistant Principal

“By implementing Learning Ladders, we have addressed our assessment challenges and improved the quality of teaching and learning for our students.”

The main aim was to find a system which would provide coherence and consistency in the assessment processes.

Before implementing a new system for Early Years Foundation Stage (EYFS), Ranches Primary School faced challenges where we were finding it increasingly more challenging to effectively track the progress our children were making and then present this to stakeholders.

It was an area for development from one of our inspections, to align assessment in all subjects to the high standards in English, Mathematics and Science. So, we made the decision to move EYFS and Primary across to Learning Ladders.

Learning Ladders has provided the school with a comprehensive tool for tracking student progress, linking assessments directly to the school curriculum, and providing valid and reliable measures of student development.

Implementation & Support

“Our implementation of Learning Ladders has been extremely successful, as evidenced by the positive feedback from teachers and staff and improvement in student outcomes.”

Ranches Primary School implemented Learning Ladders successfully by following a well-structured and comprehensive approach that included engaging with training, free help guides, and webinars provided by Learning Ladders.

The school’s senior leaders identified key personnel who would lead the implementation process and ensure that all stakeholders were involved in the process. They worked closely with the Learning Ladders team to ensure that the platform was tailored to the school’s specific needs and requirements.

During the implementation process, the school faced a few challenges, such as resistance from some staff members who

were not comfortable with using technology or had limited experience with online assessment tools. However, the school’s leadership team worked closely with these staff members to access Learning Ladder’s support and training, which helped to overcome these challenges successfully.

The school’s leadership team ensured that all stakeholders were involved in the process, and the use of training, free help guides, and webinars helped to ensure that staff members were confident and competent in using the platform effectively.

How Learning Ladders adds Value to our School

Enhancing Assessment & Tracking

Learning Ladders provides a comprehensive tool for tracking student progress and development, which will continue to help teachers and senior leaders at Ranches Primary School to monitor student progress and identify areas where additional support may be required. By using Learning Ladders, teachers will be able to track progress across multiple subjects and identify gaps in learning that require attention.

Improving Communication with Parents

Learning Ladders provides a platform for communicating with parents and sharing information about student progress. This will enable parents to be more engaged in their child's learning journey and provide them with timely feedback on their child's progress.

“Learning Ladders continues to add significant value to Ranches Primary School’s assessment and tracking processes”.

How Learning Ladders adds Value to our School

Supporting Targeted Intervention

Learning Ladders provides teachers with detailed data on student progress, which will help them to identify students who require additional support or intervention. This data will enable teachers to target their intervention strategies effectively, ensuring that students receive the support they need to achieve their full potential.

Facilitating data-driven decision making

Learning Ladders provides schools with reliable and valid data on student progress, which will enable senior leaders at Ranches Primary School to make data-driven decisions about curriculum development, staffing, and resource allocation. This will help to ensure that the school is using its resources effectively and delivering high-quality education to all students.

Overall, Learning Ladders enables the school to provide high-quality education that supports the holistic development of each student.
