## Helping St James' CE Primary School create their own training content

### Background

St. James' CE Primary School is a large primary establishment in Bermondsey, where all pupils are made to feel safe, cared for and valued. Searching for a way to streamline training with a cost effective approach, St. James' found their solution with TrainingSchoolz.

### Q&A with Ruth

#### **How easy has TrainingSchoolz made it to get training out to candidates first time?**

I would definitely say TrainingSchoolz was fairly straightforward to use!

#### **How does TrainingSchoolz approach compare in terms of ease, convenience, cost to the alternatives you had on offer?**

I use a computer all day for all sorts of different things, so once you've used one thing it's not that difficult to transfer that knowledge to something else. We have used online training which was a bit more specific in the past, but TrainingSchoolz is much more responsive than the alternatives we have used and I think it's a well-priced product.

#### **Have you tried creating your own content with TrainingSchoolz?**

One of the features of TrainingSchoolz is that you can put your own training on and it's tailored for you. I like it!

When we have new staff, we get them to sign an Acceptable Use Agreement. They're starting a new job and you're bombarding them with information, so they probably don't read it and just sign it.

# St James' CE Primary School

What I did was actually put it on TrainingSchoolz and they had to read it to complete each section, which forced them to read it as part of their induction. **I really like the freedom to be able to add your own content! It was helpful to have evidence that everyone had completed their training.** We were Ofsted inspected this year and we were ready to show that everyone had done their Safeguarding training in addition to doing inductions. It made us look thoroughly prepared because we were able to revisit that information in the form of the online training.

## **What are the main benefits of using TrainingSchoolz to you and your school?**

Being able to not only use the one-size-fits-all training on TrainingSchoolz, but also having the option and being able to add our own training. We also have an evidence trail that training has been completed by staff.

## **Do you find your selected plan with TrainingSchoolz value for money?**

It's relatively good value for money! We don't have to run the same training three times in a year and we can be relatively confident that the messages we need to get across have been put across in as many ways as possible. It's another tool that we can use without having to make staff stay late or go to another meeting, meaning it's more cost effective than an alternative like sending them off-site for training.

## **If you had any queries with the platform or your selected plan, did TrainingSchoolz support you in an efficient and professional way?**

Yes absolutely. I felt that the people that I spoke to really knew the product.

## **Why not get in touch today to see how we can help with the training of your school staff?**
